## DATA PROCESSING OPERATION: “POEMS STAKEHOLDERS DATABASE”

### Introduction

POEMS – the Portuguese Competence Centre in Semiconductors – is a project supported by the Chips Joint Undertaking and its members, including top-up funding by FCT – Fundação para a Ciência e a Tecnologia, I.P. This cutting-edge initiative, framed under the Chips for Europe, directly addresses the critical needs outlined in Axis 1 of the National Semiconductor Strategy, targeting capacity building and key technological advancements. This strategic alignment aims to catapult Portugal to the forefront of semiconductor innovation and production, specifically focusing on microelectronics and semiconductors, pivotal for elevating the existing industrial and technological capacities to meet the key global challenges. Focusing on the strategic areas of chip design, advanced packaging, and emerging semiconductor technologies, POEMS leverages the diverse expertise of its 16 consortium partners, including leading research and academic institutions, that bring specialised training resources and cutting-edge capabilities. The consortium as whole is perfectly aligned to overcome the technological challenges in these domains, propelling Portugal towards a leadership position in the European semiconductor industry.
